PROFESSIONAL SUMMARY

Customer Support and Digital Operations professional with experience across iGaming support, content moderation, trust & safety workflows, technical troubleshooting and back office operations. Skilled in ticket handling, case management, policy application and quality review within remote and cross-functional environments. Proficient with Zendesk, SharePoint, Confluence and Excel as core operational tools. Native Portuguese speaker with C2-level English and strong written communication across UK, US and European teams.

CORE SKILLS

Customer Support: ticket handling, chat & email support, account queries, payment issues, escalations, CSAT, first-contact resolution

iGaming Support: player accounts, verification (KYC), bonus queries, responsible gaming, payment troubleshooting, multi-channel support

Trust & Safety: content review, policy application, risk monitoring, quality review, escalation workflows, compliance documentation

Technical Support: Windows / Linux, VPN, help desk, remote troubleshooting, incident logging, user support, technical documentation

Back Office & Operations: case management, SLA adherence, process documentation, data organisation, operational reporting, workflow execution

Tools: Zendesk, Excel, SharePoint, Microsoft Teams, Outlook, Confluence, WordPress, AI tools, SQL (supporting), Power BI (supporting)

Languages: Portuguese – Native (BR/PT) | English – Fluent, C2

PROFESSIONAL EXPERIENCE

Independent Digital Operations Projects

Freelance / Self-Directed | May 2025 – Present | Remote, Lisbon

- Managed WordPress-based digital projects, including content updates, SEO structure, publishing workflows and troubleshooting.
- Used AI tools to support research, documentation, content planning and operational task execution.
- Organised project tasks, content calendars and simple reporting using Excel and digital planning tools.
- Tested and improved website structure, internal links, page updates and publishing processes.
- Built practical experience with remote workflows, documentation, AI-assisted productivity and digital operations.

Tools: WordPress, Excel, Microsoft Teams, Notion, AI tools (ChatGPT, Claude), Google Workspace

iGaming Customer Support Analyst

Entain Group | Nov 2024 – May 2025 | Lisbon

- Delivered multi-channel customer support (chat, email, ticketing) for a global iGaming platform, handling account queries, payment issues, product questions and technical troubleshooting.
- Managed player account issues including login problems, verification (KYC) requests, bonus queries and responsible gaming concerns, following internal procedures and escalation paths.
- Investigated and resolved payment-related issues, liaising with internal teams to provide accurate, timely resolutions and maintain high CSAT scores.
- Maintained clear and accurate case records in Zendesk, ensuring SLA compliance and full audit trail for each player interaction.

- Adapted communication style to diverse international audiences, delivering consistent and empathetic support across English and Portuguese channels.
- Escalated recurring issues to product and technical teams with structured case notes, contributing to knowledge base updates and process improvements.

Tools: Zendesk, SharePoint, Microsoft Teams, Outlook, Excel

Customer Operations & Trust & Safety Support

Accenture | Feb 2019 – Oct 2023 | Lisbon

- Reviewed and moderated digital content against platform policies, applying consistent guidelines to flag, escalate or approve submissions across high-volume queues.
- Applied trust & safety policies to evaluate content risk, identify violations and produce well-documented decisions under time pressure and quality targets.
- Conducted quality review of processed cases, identifying errors, maintaining accuracy rates and supporting team KPIs and SLA adherence.
- Managed case documentation across Confluence and internal systems, ensuring complete, consistent and audit-ready records for all reviewed items.
- Supported risk monitoring activities by flagging anomalies, tracking recurring patterns and escalating high-risk cases to senior review queues.
- Handled customer operations tasks including account data requests, cross-team information flows and internal documentation queries across business units.
- Contributed to process improvements, onboarding materials and team knowledge base updates across a nearly five-year tenure.

Tools: Confluence, SharePoint, Excel, SQL (reporting), Overflow, Power BI

Desktop Support Technician

Wisdom Hardware | Apr 2008 – Feb 2014 | Sao Paulo

- Provided front-line technical support for end users, resolving hardware, software, network and OS issues (Windows and Linux) in a help desk environment.
- Diagnosed and troubleshooted connectivity problems, peripheral failures and application errors, delivering timely resolutions and minimising user downtime.
- Managed VPN access provisioning and remote connectivity support for distributed users.
- Maintained incident logs and authored user-facing documentation in English and Portuguese, including troubleshooting guides and FAQs.
- Coordinated with vendors and internal teams to improve system reliability and service delivery standards.

Tools: Windows OS, Linux OS, Microsoft Office, Outlook, Excel, SharePoint, VPN Tools

SUPPORTING TOOLS & PROJECTS

Practical projects using Excel, SQL, Power BI, WordPress and AI tools applied to content organisation, operational reporting, research workflows and documentation. These skills support back office, digital operations and data annotation tasks rather than defining the main professional focus.

EDUCATION

Bachelor of Science in Computer Science

University Unicamp Campinas, Brazil | 1998 – 2003

Core areas: operating systems, networking, programming fundamentals, analytical reasoning.
